## 4. FUEL ADJUSTMENT FACTOR (FAF)

LPC uses a monthly Fuel Adjustment Factor (FAF) calculation to compensate our business for increases to diesel fuel prices.

The calculation is based on an index price from January 2019 and uses a tier system to calculate applicable FAF charges depending on the variation to the index. Data is taken from monthly Ministry of Business and Innovation reported fuel prices.

When the FAF is triggered, an additional fee will be charged to lines / vessel operators based on the below schedule. Transition from one tier to another must be for two consecutive months for the FAF tier to change.

<b>LPC FAF Pricing Schedule</b>			
<b>FAF Tier</b>	<b>Threshold to Jan-19 Price</b>	<b>FAF per Tug Used</b>	<b>FAF per Container Unit (across wharf)</b>
Tier 0	Less than 10% above	Nil	Nil
Tier 1	10% - 20% above	\$50	\$1.75
Tier 2	20% - 30% above	\$100	\$2.50
Tier 3	30% - 40% above	\$150	\$3.50
Tier 4	40% - 50% above	\$200	\$4.50
Tier 5+	Greater than 50% above	TBC	TBC

Our FAF calculation is fully transparent and is available for review by any customer at any time on request. We reserve the right to review and amend the FAF process at any time, in particular situations where there are large price fluctuations over short time periods.

Notification of our current FAF level will always be available on our website (link below) and we will send out a customer notice when the FAF tier changes up or down.

## 5. DREDGING SURCHARGE

### Dredging Surcharge (DS) from 1 January 2024

Regular hydrographic surveys and environmental monitoring, conducted as part of LPC's maintenance dredging programme, have found that our main channel continues to see historic infill rates.

To ensure that LPC can conduct the required dredging programme and maintain a critical port infrastructure, an annual Dredging Surcharge (DS) has been implemented. This replaces the previous Emergency Dredging Surcharge EDS that ended on December 31, 2023.

The charges are as follows and are effective from 1 January 2024 until 31 December 2024:

Ancillary Charge	Charge	Description
DS - Containers vessels	\$5.27 Per TEU	Charged direct to shipping lines for all containers stevedored through LPC, including import, export, trans-shipment – full and empty containers
DS - All other vessels	\$0.20 Per GRT	Charged directly to the vessel owner for all vessels over 43m (LOA), including Pilot exempt vessels

Dredging surcharges will be reviewed annually, and any change will be notified for 01 January implementation.
